

Padlet

Padlet has endless ways it can be used for the classroom. It is a great way to organize. You can add lesson plan and attached all the worksheet and materials to the same page. Parents, administrators or coworkers can look on your Padlet and see what is being taught in your classroom. It would be a great alternative way for a student who is missing school to keep up with what is being taught in class. Students can also upload their projects and class assignments. I think it would be an excellent tool to keep everyone involved in my student's education on the same page.

On-Line Tools

I have discovered that there are more on-line tools out there that I would not be able to use them all, if I used a different one every single day. There are some great tools that will help me become a better teacher. These tools will enhance my lessons by giving life to my words and activities. My students will be able to engage in my lessons better because of all the different types of technology. I love the endless possibilities that on-line tools provide. The only thing I dislike about on-line tools are that can be costly.
