

## Personal VPod Information

My name is Rebecca Ring. I have created a video about myself that will help you get to know me better as your teacher. I am forty-four years old. I was born in West Memphis, Arkansas. I attended Marion until from Kindergarten through the seventh grade. I then transferred to West Junior High in the eighth grade and graduated from West Memphis High School. After High School I moved to Jacksonville, Florida. I lived there for a few years. However, I missed my family and moved back to Arkansas to be with them. I have an older brother and sister. My brother, Michael, lives in Olive branch with his wife and two children. My sister, Beth, lives in Bryant, Arkansas with her husband and son. My parents are still happy and healthy. They are currently enjoying their retirement together while still living in Marion.

My dream is to move to Gulf Breeze, Florida. My boyfriend and I currently have a house there and we visit there once a month. Both my boyfriend and I are teachers therefore, it is a perfect get a way for us. We dream of waking up each morning, riding our bikes to the ocean and watching the sun rise while stand up paddle boarding through the waters. I also plan on joining the local tennis club. I plan on using tennis to stay active throughout my life.

One important piece of my teaching philosophy is diversity in the classroom. I believe that we can all learn from one another. In my classroom, we encourage and celebrate our differences. I think it is important that each child feels loved and wanted in the classroom and celebrating diversity is an important key to that.

I intend to integrate technology into my classroom in many ways. Students will Chromebooks, computers, the whiteboard and other types of technology every single day in my classroom. I believe it is important for students to have a well round understanding of how to use technology for enhancing their imaginations and learning abilities.

I would like to end this by quoting Dr. Sues "Oh, the places you'll go."
