
Mimo

Version: 3.20

Publisher: Mimohello GmbH

Target Audience: Children ages 4 and up

Curriculum: The coding app is useful for testing children over content. Children must pass the first activity to move on to the next activity.

Cost: 9.99 a year or an option for 2.50 a month when a year is bought in full

Software description: Mimo is a great app to teach children how to code, make websites, and much more all while playing games. Mimo personalizes a learning path for each student to help keep them entertained and motivated to play.

Impression of software: This is a great app that is encouraging to students while being fun for all students. After each task/level students earn a certificate of completion rewarding them for completing the level and encouraging the, to complete the next level.

Does it pass? Yes!
