Spelling City

Version: 2.0.5

Publisher: SpellingCity

Target Audience: 4+

Curriculum: Reading/ Language Arts

Cost: free website, but to play all of the games students will need to be premium members

Software description: This app runs very slow and does not offer a lot of games or activities. The screen is colorful, but does not hold my attention for long. I wish there were graphics and sound features during the games to encourage students to keep going.

Impression of software: Overall, we were not impressed with this app. It was slow, did not correct us when we got an answer incorrect, and most of the time would not let us even answer the question. There seems to be some work that the publisher could do to make this app more fun/accessible for all.

Does it pass? NO
