

All About Me!

Subject: Language Arts

Grade: First

Tools: Padlet and QR Creator/Reader

Synopsis: For this lesson, I will first create a personal Padlet board about me to share with my students. Students will be able to access this Padlet by scanning a QR code that is on the instruction sheet. After looking at my personal Padlet, students will create their own Padlet. Their Padlet will include a picture of them, favorite color, favorite food, favorite animal, what they are excited about learning this year, and a picture of their pet if they have one. After creating a Padlet called All About Me, the students will create a QR code of their board to turn in this project.
