Title:	Padlet
Version:	96.0
Publisher or Producer:	Wallwisher, Inc.
Targeted Audience:	This app is targeted for students ages 4 and up.
Types of software with your justification:	Tools: This app falls under the tools category because it is used to help students in their process of learning new information rather than teaching the students new material.
Curriculum:	On Padlet you start out with a blank canvas, so you could use this in any subject area.
Cost:	A monthly subscription can be purchased for \$12.99 a month and a yearly subscription can be purchased for \$99.99.
Write a paragraph or two describing the software	Padlet is a digital canvas that users use to make different things. A few examples that users can make are a bulletin boards, blogs, or even a portfolio. Padlet also allows you to share things that you made with others.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	Padlet was a bit confusing at first. In a classroom the teacher would definitely have to walk the students through how to use it. This app could be used for a variety of different projects. This app would be good for group projects, so the students could help each other if something was difficult. Some examples of projects to do in your class could be make a timeline, make a book review, make a presentation, do a story analysis, and so much more.

Title:	Explain Everything
Version:	5.4.7
Publisher or Producer:	Explain Everything sp. z o.o.
Targeted Audience:	Students ages 4 and up who have a desire to edit documents or draw
Types of software with your justification:	Tools: This app qualifies as a tool because there is no new foundational learning to be done. It is simply enhancing previous knowledge and helping to aid in the learning of new material.
Curriculum:	Can fit into science or english curriculum through editing documents to gain a deeper understanding of the document and labeling pictures such as labeling parts of the body or flowers.
Cost:	Free version or paid version for \$13.99, but the free version requires a subscription
Write a paragraph or two describing the software	The software was created to help users to edit pictures and files. The user can write or draw on the document as well as edit it. As far as editing goes, they can crop it, and resize it to fit the needs of their project. Finally, users can choose to send or receive documents to and from their peers.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this app could be useful in teaching students to annotate articles for research. It could also be used when having students identify and label a picture for various subjects. This app is easy to use and could be used by students with varying abilities. However, I think that the services that this app provides can be more effectively used with paper and pencils.

Evaluation Write Up

Title:	QR Scanner
Version:	2.3.3
Publisher or Producer:	TinyLab
Targeted Audience:	This app is targeted for students ages 4 and up.
Types of software with your justification:	Discovery learning: The user of the app is determining what to learn.
Curriculum:	This would be a great software to be used in a math class. Students could scan a variety of different things and add them all up.
Cost:	With this app you get three days free and then you have to pay \$7.99 a month.
Write a paragraph or two describing the software	QR scanner can scan basically anything with a barcode. From drinks, food, clothes, toys, etc. This app also allows you to create your own QR code. A few options for creating a QR code could be for your email, a URL, phone, messages, facebook, instagram, spotify, twitter, etc. This software was very user-friendly.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I could see students using QR scanner as a math project. Students could scan several different objects and add the prices up. They could do this as a group or individually. This app would also be great for students to make a QR code to share information with other students in the class or their teacher. The only downside to this app is that it is only free for three days and then you have to pay \$7.99 to use it.

Title:	Total Recall
Version:	5.0
Publisher or Producer:	Zyense
Targeted Audience:	Users 4 and up that wish to organize information
Types of software with your justification:	Tools: This app fall under the tools category because it is used to aid students in the process of learning new information instead of teaching students new material.
Curriculum:	Can apply to the curriculum of any subject because it can be used to organize any information
Cost:	The app is free for the first 3 mind maps, but then after that you have to pay 99 cents to get the option for an unlimited number of maps.
Write a paragraph or two describing the software	This app is used to make thought webs. Using this app users can create planning webs for assignments. They can also use this to organize data. They have the ability to manipulate shapes to make them bigger, smaller, different colors, or even different shapes. There is also an option to send these webs to other people in order to share something that the user has created
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This app is an easy way for students to organize their thoughts and ideas when planning for an assignment. This can help to teach students how to organize information for essays or other projects. This can also help students to create chronological representations of information. This app is easy to navigate and simple enough for even young students to use.

Evaluation Write Up

Title:	Brainpop
Version:	3.1.9
Publisher or Producer:	BrainPOP
Targeted Audience:	This app is targeted for students ages 4 and up
Types of software with your justification:	Tutorial and drill and practice: This app falls under the category of tutorial and drill and practice because it is teaching students new information by showing them videos and then it provides students with quizzes and worksheets which is drill and practice.
Curriculum:	This software offers curriculum-based topics in math, science, social studies, english, engineering, technology, art, music, and health.
Cost:	There is a free version, but it has limited video access. There is also a full access which is 800 plus videos, which is \$6.99. Then there is an explorer version which is \$2.99.
Write a paragraph or two describing the software	Brainpop is a software that has hundreds of videos, quizzes, educational games, activity pages, lesson plans and more. This software offers curriculum-based topics in math, science, social studies, english, engineering, technology, art, music, and health. This software was very easy to use.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This app seems like it would definitely be worth paying for because it is something that teachers could use everyday in their lessons. It covers so much material and offers videos quizzes, games, and activities for the students to explore.

Evaluation Write Up

Title:	Mimo
Version:	4.0
Publisher or Producer:	Mimohello GmbH
Targeted Audience:	Users who are interested in learning how to code that are ages 4 and up
Types of software with your justification:	Tutorial and drill and practice: This app falls under the category of tutorial and drill and practice because it is teaching students new information, step by step, and then giving them drill and practice problems in order to assess their learning.
Curriculum:	Can apply to computer science curriculum since this app is teaching computer skills
Cost:	Yearly subscription of \$59.00
Write a paragraph or two describing the software	This app is used to teach the user how to code. It consists of step by step directions and questions along the way to assess learning. It also contains various different content areas to ensure that the user is learning the material that they desire.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this app is truly wonderful. It teaches coding in the best way that I could imagine. It breaks it down to step by step directions that make it simple, even for children. Students of various abilities could complete these activities. This app makes it incredibly easy to learn how to code. Teachers could then take the knowledge that students have gained while using this program and apply it to an assignment to assess their learning.

Title:	Swift Playground (by apple)
Version:	3.1
Publisher or Producer:	Apple inc.
Targeted Audience:	Users who wish to learn to code that are ages four and up
Types of software with your justification:	Tutorial: This app falls under the tutorial category because it teaches students new information step by step and displays to them how to do each action that is required.
Curriculum:	This can fit in to the curriculum of computer sciences
Cost:	free
Write a paragraph or two describing the software	This app is an easy way for students to learn how to code. It makes coding into a game that is both visually appealing and entertaining. This app also breaks coding down in to easy individual steps. This makes it simple for even young students to understand as long as they know how to read. It also contains a large number of various coding types and operations so that students can learn coding in depth.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this app is extremely helpful and easy to navigate. It takes the user through step by step directions that help the user to quickly grasp the concepts that are being taught. This could be used to give students a deeper understanding of their computer and how to use it. The app is also encouraging to students when they get an answer right. It displays appealing colors and animations that draw students in and make them want to learn the information.

Evaluation Write Up

Title:	Khan Academy
Version:	6.4.0
Publisher or Producer:	Khan Academy
Targeted Audience:	Students seeking to learn new material or receive help in a subject, ages 4 and up
Types of software with your justification:	Tutorial: I think that this app is considered a tutorial app because it teaches students new material and provides videos and explicit directions in order to teach students new concepts
Curriculum:	Can apply to the curriculum of any subject because tutorials and practice problems are provided for any grade level and any subject
Cost:	free
Write a paragraph or two describing the software	This app provides explicit instruction that teaches students new topics in a variety of subjects. It also provides instruction for a variety of grades. This ensures that there will be videos and practice problems for students in any subject or grade that they could possibly need.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this app is incredibly helpful for a variety of students. It provides videos that teach students step by step how to do what they are working to learn. The practice problems are also incredibly helpful because they help students to assess their abilities. They also help teachers and students to be able to see where their student still needs improvement which helps to ensure that students are learning a topic to the full extent.

Evaluation Write Up

Title:	iMovie
Version:	IOS 11.4
Publisher or Producer:	Apple
Targeted Audience:	This app is targeted for students ages 6 and up.
Types of software with your justification:	Discovery learning: The user of the app is determining what to learn.
Curriculum:	iMovie could be used in any subject. This is a great app to make videos.
Cost:	iMovie is a free software.
Write a paragraph or two describing the software	iMovie has two options when opening it up. Trailer and Movie. If you pick a trailer the software builds a movie for you as you add in information and if you pick a movie you have to create your own movie from scratch. When creating your own movie you can add music, sound effects, pictures, and videos from your device and more.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	iMovie is a great app for students. This app is very user-friendly. iMovie is a free app that usually comes on apple devices. This is great for group projects among kids. For younger children, I would recommend starting with a trailer when making your project. A trailer is a temple made by iMovie that you plug videos in. Older children could start from scratch to make a movie. From scratch allows you to add photos, videos, and your own personal music. I really enjoyed this app.

Evaluation Write Up

Title:	Codecademy Go
Version:	1.9
Publisher or Producer:	Code Academy
Targeted Audience:	students ages 4 and up who wish to learn how to code
Types of software with your justification:	Tutorial and Drill and Practice: This app is a tutorial and drill and practice software because it provides new information to users through teaching them how to code and then quizzing them on the information that they just learned.
Curriculum:	Can be applied to computer science curriculum because it is teaching computer skills that will help students to better understand how to work and control their computers
Cost:	free
Write a paragraph or two describing the software	This app is used to help students learn how to code. It provides information on how to perform the coding processes. After the information has been read by the student, they are quizzed on the information that they previously read. There are also various programs that students can learn to code in that go into more depth than the first initial tutorial. Once students complete the initial tutorial they have the option to learn how to code style sheets and JavaScript.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This app is useful in learning to code. It can be used in the classroom to give students a deeper understanding of how websites and other technological systems work. I think that this app is helpful, but it would not be helpful to young students. I think that the app does not break down the information enough for young students to truly learn the concepts of coding.

Evaluation Write Up

Title:	Animal Math
Version:	1.7
Publisher or Producer:	Eggroll Games LLC.
Targeted Audience:	This app is targeted for students ages 4 and up.
Types of software with your justification:	Drill and Practice: This app is Drill and Practice because it is material students have already learned and now they are practicing it on the game. After students complete a level on the game they can move on to the next level.
Curriculum:	This is app can be used for math.
Cost:	There is a free version, but it only offers three levels. To unlock all levels it is \$6.99.
Write a paragraph or two describing the software	This software is great for helping children learn math. The free version offers a game for counting to ten, a game for sequences and patterns, and an addition game to five. Each game will ask you a series of questions if you answer them correctly your character will move closer to their destination until they reach it.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This software would be a fun way of learning math for students. This software would be a great game for students to play in their free time at school. Specifically after a math lesson if the student got done with their work early.

Evaluation Write Up

Title:	Solar Walk Lite: Planetarium 3D
Version:	2.7.2
Publisher or Producer:	Vito Technology inc.
Targeted Audience:	students ages 4 and up that are interested in learning about the solar system
Types of software with your justification:	Discovery Learning: I believe that this app falls within the category of discovery learning due to the nature in which the app is operated. Students are in total control over what they learn by clicking on various objects and reading the information provided.
Curriculum:	This can apply to science curriculum because it has copious amounts of information about the solar system and it could even apply to english curriculum depending on what the assignment is
Cost:	free
Write a paragraph or two describing the software	This app contains images of the planets in our solar system along with their moons and any other prominent bodies in our universe. Once a student clicks on a planetary body, the app zooms in on the item and gives the student a variety of information to choose from. They can choose to learn about the composition of the object, general information, and statistics about it. This gives students an abundance of information to choose from.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this app could be incredibly helpful in a variety of assignments. It could be used as a resource in various projects about the planets. It could also be used as a teacher resource when teaching about the solar system. It is also incredibly easy to navigate and visually appealing. This helps to keep students interested in the information that they are learning.

Evaluation Write Up

Title:	Dear Diary
Version:	1.4.1
Publisher or Producer:	Tapps Technology
Targeted Audience:	This app is targeted for students ages four and up.
Types of software with your justification:	Simulation: This app is simulation because it is about real life situations.
Curriculum:	This app is mainly just for fun, but it could be used for reading.
Cost:	This app offers free access, but if you want to remove the adds and read more it is \$3.99.
Write a paragraph or two describing the software	On Dear Diary you have access to only one page a day. Dear Diary is all about choices and choices. You read something and then decide what the character does next
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This software was simple to navigate through. It could be used in a reading class because in the app you read a journal and then decide your character's future. I was impressed with how much the app had to offer for being free.

Evaluation Write Up

Title:	River Crossing
Version:	1.1.1
Publisher or Producer:	Abd Alhameed Alhinbalzy
Targeted Audience:	students who wish to use critical thinking skills ages 4 and up
Types of software with your justification:	Problem Solving: I think that this software qualifies as problem solving because in order to complete a level, students must figure out how to cross the river while also satisfying a set of conditions.
Curriculum:	This can be applied to the curriculum of any subject because it works to develop the foundational skill of problem solving and does not specifically pertain to a subject.
Cost:	free
Write a paragraph or two describing the software	This app provides a number of problem solving situations. As students solve the problems, they progress to more difficult levels. As a result students are required to use more critical thinking skills as each level is completed. It also provides clues to help remind students of the previously stated conditions and to give them tips about how to complete the level.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	I think that this game is extremely helpful in helping students to develop and grow their critical thinking and problem solving skills which they can then use in a variety of subjects. I think that this is a great app for older students. It does not have a great deal of instruction when first starting the game and the difficulty of the first level also leads me to believe that this app is not necessarily appropriate for younger students.

Evaluation Write Up

Title:	Storyteller
Version:	1.1.2
Publisher or Producer:	Arjun Kunjilwar
Targeted Audience:	This software is targeted for students ages four and up.
Types of software with your justification:	Tools: This software is a tool because the user creates the desired type of file.
Curriculum:	This app could be used in any subject. This is a great software for making a timeline.
Cost:	This a free software.
Write a paragraph or two describing the software	Storyteller is a great software to use to make a timeline. This software is very simple to use. All you have to do is enter a timeline name, time period, and then a brief description of the event. You can add an unlimited amount of events.
Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class	This software was easy to navigate. This app could be used in any subject area to make a timeline. The only issue I saw with this app was that I did not see a spot to send your timeline or save it to your camera roll.
