Additional Comments			iMovie is a great app for students. This app is very user-friendly. iMovie is a free app that usually comes on apple devices. This is great for group projects among kids. For younger children, I would recommend starting with a trailer when making your project. A trailer is a templet made by iMovie that you plug videos in. Older children could start from scratch to make a movie. From scratch allows you to add photos, videos, and your own personal music. I really enjoyed this app.
