

Habitats and Ecosystems

3rd Grade Science

Standards: 3-LS4-3

Technology: VR goggles, Kahoot

In this lesson students will review weather in specific ecosystems and habitats in a Kahoot quiz to help reinforce knowledge that they have previously learned. Then they will use VR goggles to view a variety of ecosystems around the world. This will help them to get a more in depth visual understanding of each ecosystem. This will help students to have a better idea of what each ecosystem looks like.
