

Mini-Lesson2: The 27 Amendments

1. Grade Level: 4th
2. Curriculum Topic: 27 Amendments of the Constitution
3. Tools: Random Name/Word Picker allows the teacher to input a class list and helps facilitate random name picking. You can also use this app to add keywords and use the tool to have the class prompt a student to guess the word by providing the definitions, but I would like to use this tool to help pick groups in the class so that they are random and the kids are constantly working with others. The other tool I would like to use is Padlet to create a board explaining the Amendments they are assigned in their group.
4. Synopsis: . I want to use the Random Name/Word Picker to have them break into groups of three and use the KWL chart template and create three column where the kids have to work together in their group and research and give me information on the amendments that they will also draw when they are assigned a group number.
5. This will be groups of three broken down by the name picker tool and working as a group to search for the Amendments they are assigned and to explain what each is to the class and the importance of the Amendments along with some interesting facts.
