

Mini-Lesson 1: Habitats.

1. Grade Level: 4th Grade
2. Curriculum Topic: Animal Habitats and the Animals that live there.
3. Tools: Kahoot- is a game-based classroom response system, that allows me the teacher create quizzes online that the class can connect to and take together. The other tool I want to us is called Pear Deck, is an app that allows me to create or build and interactive presentation that both me and the students can participate with our iPad to finish a project.
4. Synopsis: I would like to use Pear Deck to plan and build and interactive presentation that students can participate on their smart device or iPad. I want the kids to add information to the PowerPoint I have already created on Animal Habitats. After we have spent some time creating and adding information to the PowerPoint, I want us to move to the Kahoot and take a practice quiz over the habitats and animals that live in each.
5. Whole Class: by using the Pear Deck the class is able to get on the presentation that I have created and add their own information so that we can add ideas, brain storm, pictures and finish the presentation faster and allows them to get a chance to add their own ideas.
