App Title: A QR Reader and Creator

Publisher or Producer: TapMedia Ltd

Version of App: 7.5

Target Audience: 12+

Type(s) of Software: Tool – It is used create different codes for learning, but you can also scan codes to learn information about the item that the code is on.

How does it fit into the curriculum? This app could be used to scan codes to find out more about an item such as nutrition facts on a soda bottle. It can also be used to make codes to take you different websites.

Cost or In-app purchases: QR Reader PRO (one-time fee) \$2.99, Database Scanner (1 month) \$0.99, TapMedia PRO (1 month) \$1.99

Software Description: This App allows you to scan QR codes, barcodes, documents, business cards, URLs and puzzles. You can also create your own QR codes to share with others. When creating your QR code, you can choose from multiple choices such as website, phone number, text, GEO location, Email address, contacts, SMS, event, and even social media. It gives you the option to make a custom or transparent QR code. However, the transparent is only included in the premium package. Then you can change the background color or if you have the premium package you can change the body shape, body color, eye shape, eye color, eye-ball shape, eye-ball color, and add logos.

Software Impressions: Overall, we were not impressed with this App. The only thing that did impress us was that it could scan and solve a Sudoku puzzle. There was not much you could do on it without having to upgrade to the premium package.

Does the software pass APPS: No
