

4th Grade Social Studies

This mini lesson will be for my 4th grade class.

The students will create a song based off of world war 2. They can choose the perspective of the Germans, the Jewish people, the Americans, or just a generalization.

As a class we will have studied World War 2 prior to this lesson. I will review important details and a timeline of events. Students will plan their song on the app Evernote that is on the iPad. This is the perfect app for students to plan with and develop their song with. Once their song is finished, they must check it off with a peer. This is to ensure that the information is accurate and a good representation of this time. The student will then go to the Specdrum and create a beat for their song. This can be a beat, a combination of instruments, or designing their own sounds to fill in background sound. The app Evernote will allow for a video recording of the song and beat together.
