

Presentation Lesson

This mini lesson is for my 6th grade science class.

Students will research an animal of their choice. They will figure out where they live, what they eat, and the type of animal they are. They will then make a 5 slide powerpoint of the animal they chose. This mini lesson will work on their research skills and public speaking.

Students will use their laptops/chrome books to do research and create their presentation. They will get the information they need from <https://kids.nationalgeographic.com/animals/> and dig to find the animal of their choice. This website provides information, history, geography, and pictures of the animals. They will take notes on each of these topics and create a PowerPoint presentation that they will then present to the class.
