

Evaluation Write-Up

Group Member Names: Sydney Sweat, Corey Anderson, Katie Anderson

App Title: Splash Math

Publisher or Producer: StudyPad, Inc

Version of App: 5.7.19

Target Audience: Made for ages 6-8 but also has information and activities for grades K-5.

Type(s) of Software: Drill and Practice – This app allows students to practice math skills that they have already learned to improve their knowledge.

How does it fit into the curriculum? This could be perfect for students to use and work on based on the skills we were learning in class while I met with students who needed extra assistance. This dives further into the skills that we would approach and allows them to further explore.

Cost or in-app purchases: There is a lite version that gives the user an idea and a feel of the app. There are lots of in app purchases. You can purchase a \$7.99 monthly plan, \$4.99 (\$59.99) yearly plan, and \$7.99 (\$23.99) quarterly plan.

Description of the Software: This is an app to help your student explore and grow in their math skills. It has a variety of activities and pictures to keep the student engaged. If your student is behind this is the perfect app to work on skills to catch up. It is a curriculum-based app that is personalized to the user.

Impression of the Software: This is a useful tool for students who are struggling. It has so many different skills and levels that could help any level of student. I think buying the app would be more beneficial and better help the students who are using it.

Does the software pass APPS: Yes
