

Ms. Yeargan's April Newsletter

🌸 Important Dates and Events 🌸				
Monday	Tuesday	Wednesday	Thursday	Friday
			1 April's Fools Day/ PJ Day	2
5	6	7	8	9  Alyssa's B-Day
12  Michael's B-Day	13	14	15  Savannah's B-Day	16
19	20	21	22 Earth Day Nature Walk	23 Review Party
26 Unit Test	27	28	29	30  Blake's B-Day/ Final Project-Family Event

Points in the Unit Theme:

The Energies we use!

- What Energy is
- Types of energies we see
- Going further in depth with some energy types
- Types of heat transfer
- Other types of energy transfer
- Energy Conservation

Final Project Summary:

Students will find an everyday source of energy transfer. Once they have decided what they want source they want, they will video themselves showing an example of the source while explaining what it is and how it works. Afterwards, they will edit their video to their liking to help the viewer understanding what they were showcasing.

Reminder for the Parents:

- Don't forget that students will be allowed to wear pajamas on April 1st
- Earth day is on April 22nd and I will be leading a nature walk to celebrate it. If you have any concerns or questions email me.
- We will be having a review party on Friday the 23rd. If you want to provide snacks or supplies please email me.
- I will be hosting a family event on April 30th to showcase the students final project for the unit. This is open for everyone who wants to come.

Note from Ms. Yeargan:

This monthly newsletter shows a rough idea I have planned for the students this April. The students should have a copy of it in their take home folder for the parents and themselves to use. Every monthly newsletter is located on the website if a new one is needed.
