- Screencast-o-matic
  - [Screen Recorder & Video Editor | Screencast-O-Matic (screencast-o-matic.com)](#)
  - Video example link: [https://drive.google.com/file/d/1058Xhv0zVpbVDXDEmXBnarqDBq0co7xC/view?usp=drivesdk](#)
  - Description:
    - This is a video/screen recording device. You can record yourself while showing what is on your computer screen inside the dotted area that has been provided for you. Afterwards, you can edit it and publish it online to various of sources.
  - How I plan to use it
    - Students can use this tool in my classroom to record themselves presenting a power point or some other assignment that is on their computer and send it to me. This could also work for students who is sick and will miss their day to present. This way they can record themselves and I can present it to the class without having to add extra time in another day for them to present.
- Canva
  - [Home - Canva](#)
  - Example: [https://www.canva.com/design/DAEbtDcCVgw/5IqNxN_UiiQmlMtEplnxRQ/view?utm_content=DAEbtDcCVgw&utm_campaign=designshare&utm_medium=link&utm_source=homepage_design_menu](#)
  - Description:
    - It is an artistic tool that allows the user to make various of one pager designs. There are templates that people can use to make a certain type of design. There are plenty of free items for people to use but there is some payable content that gives you more access. You can post or share your design one you are done with it.
  - How I plan to use it
    - Students can use Canva to make an informative one pager about the subject they are being taught. This way I can see what information they have obtained during the lesson. I can give them the assignment of making a flyer to gain people's attention to the subject at hand. They would try to make it interesting and catchy enough for others to want to learn more about it.
- Quizizz
  - [Create a free account — Quizizz](#)
  - Example: [https://quizizz.com/admin/quiz/6077c3c9d25f75001bdf6de0](#)
  - Description

- This is a tool to be used for testing/assessment. This site can be used for assessment and having a mini lesson before the assessment. You can have a slideshow and then have questions about what they were learning afterwards. You can have multiple type of questions. You can add the images to the questions and set which questions are right or wrong.
  - How I Plan to use it
    - I can either create a small quiz after the lesson to check out if my students truly understood the subject or not. I will also do mini lessons where I create a small slideshow before the quiz to give them a reminder on some topics that they may not completely recall. It can be used as a good assessment tool for before the unit to get a understanding of what they already know.
- PixLr
  - [Photo Editor : Pixlr X - free image editing online](#)
  - The Example is the image. There is a bigger image down below.
  - Description

    - The photo editor allows you to upload photos and put them in a format to your liking. After uploading the photo/s, you can add stickers, effects, borders, text and more. This way the user can make a fun photo collage to their liking
  - How I plan to use it
    - This would be a good way to allow students to be creative at making an informative poster about the subject. They can add pictures that they want to show and make it more kid friendly or exciting to look at than just showing a normal example.
- Tagul
  - [WordArt.com - Word Cloud Art Creator](#)
  - Example: https://wordart.com/poji0r5j4ioy/word-art
  - Descritpion
    - This site allows the user a easy way of creating art. This artistic tool gives you the ability to add as many words as you want and gives you options for the image you want to use. You can even upload your own image if you don't like the options. They give you the ability to choose the color of your image and words, the font of the words, if the words are internal or external, and which direction the words will go. Afterwards you can save the image or create a link to share with others.
  - How I plan to use it

- I will have the students find a picture of a certain topic. For example, I will tell them to use an image of fire. Then I will get them to write down all the words we have learned in the lesson that can relate to image being used. This way they can keep the image afterwards and have some basic words to help them remember the information for later use.
