

Wish List

- Classroom
 - I have about 30 6th graders in each class. They are a rowdy bunch who want nothing more than to do something fun rather than sit down and listen to a lecture. Therefore, a lot of my activities are interactive to keep their attention span on me and the lesson. Although, there are times where I do have to lecture while they take notes.
- List
 - I would like to each student to have Chromebooks. Therefore, there will be about 30 in my classroom. Alongside about 15 iPads for other activities. I would also like 30 rocketbooks so students could practice their note taking and handwriting. There will be two types of rocketbooks: The notebook kind and graph paper. Another item would be 3 3D pencils for the classroom.
 - Subscription to Calm for each student.
- Additional
 - Each Chromebook has their own charging station. The same goes with the iPads. Each rocketbook should come with it's own binder to prevent damage. Each iPad should come with a wireless pencil that connects to the device.
