App Evaluations

Title	Total Recall
Version	5.0 Updated 2 years ago
Publisher	Zyense
Target Audience	Rated for age 4 and up. Would be appropriate and most effectively used in classrooms 2nd grade- 12th grade.
Types of Software	Total recall would be classified under tools, it is simply an organizational app.
How software fits into curriculum and classroom environment	It can be used by teacher and student. Teachers can use to display information regarding curriculum being taught. Students can use to organize thoughts for a paper, use it as a studying tool, or for a homework assignment.
Cost	Free
Software description	This app is an organizational app. It is a lot like the software inspiration, only not as complex to use. Users

	can make the bubbles any shape, or color. Unlimited size of mind map is included in the app.
Possible Implementations	Teachers can use this app for instructional use, they can assign homework to be done and completed through total recall. Students can use it to organize their thoughts, take notes, or complete assignments
Does the software pass APPS?	My partner and I think Inspiration is a better alternative to this app and allows for more creativity, and in-depth projects. We do give it a passing score, but would only use this app in addition with Inspiration.
