

App Evaluations

Title	AR Coding Kodabl
Version	1.0.2
Publisher	Valeriy Danyuk
Target Audience	4+ (made for ages 4-8) We both think that this app might be more beneficial for upper class because coding can become complicated. We would recommend ages 7-11.
Types of Software	This software is tutorial.
How software fits into curriculum and classroom environment	This is a tutorial software, because it is teaching the user how to code.
Cost	This app is free of charge with subscriptions Full access: \$2.99 Subscription \$1.99

App Evaluations

Software description	Tutorial Software is software that is teaching new information to the user. In this case, the user is learning how to code.
Possible Implementations	We would most likely use this app if we were teaching a technology class. It would be a very useful during a coding unit.
Does the software pass APPS?	In our opinion, this app does not pass. It was very confusing to navigate through and did not make full sense.
