

Water

Cycle

I. Condensation

A. Water vapor cools down and turns back into a liquid water.

II. Evaporation

A. Warmth from the sun causes the water to rise into the air and turn into vapor

III. Precipitation

A. Water falls from the clouds in the sky in the form of rain, snow, sleet, or hail.

IV. Collection

A. Water falls from the sky and collects in lakes, streams, rivers, and oceans
