Title: Swift Playground

Version: 3.1

Publisher/Producer: Apple Inc.

Target Audience: 4+

Types of software: This is a gaming app that teaches children programming.

Curriculums:

Cost: Free download

Paragraph describing software:

This is a programming app that teaches children what the code will look like and how to do it. The app shows the children the code and then when you click run the code, it will show what you actually did. All ages from 4 and up can use this app to learn the basics of coding.

Paragraph on impressions; how it can be used in your class:

Software can be used for both children and teachers.

Pass or Fail: Pass
