

# Let's Learn Shapes!

**Grade:** Kindergarten

**Standard:** AR.Math.Content.K.G.A.2, AR.Math.Content.K.G.A.3, AR.Math.Content.B.6

**Technology:** Osmo Tangram Game, PowerPoint

In this lesson, I will make a PowerPoint for the children over their shapes. This PowerPoint will consist of the picture of the shape, name and how many sides. Once we finish going over the shapes, we will switch over to the Osmo Tangram Game. In this game, the children get to make figures and things out of the shapes given to them, so they will have to think and really use their brains to figure out which shape goes where and how they fit together.
