

Seasons of the Year!

Grade: Kindergarten Science

Standard: ESSD2.D

Technology: VR Goggles, BrainPOP

In this lesson, the students will use the BrainPOP to go through and learn about the seasons of the year and what they consist of. After we have finished the lesson on BrainPOP, we will use the VR goggles, so that the children can really see what each season is like. Living in Arkansas we get a lot of different weather, but not severe weather. So, the children will get to see and somewhat experience what the weather is like in each season and in different parts of the world.
