

# SEASONS OF THE YEAR

By: Tariane King

# There are four seasons in the year:

Spring

Summer

Fall

Winter

As the seasons change, the environment and the weather changes too...

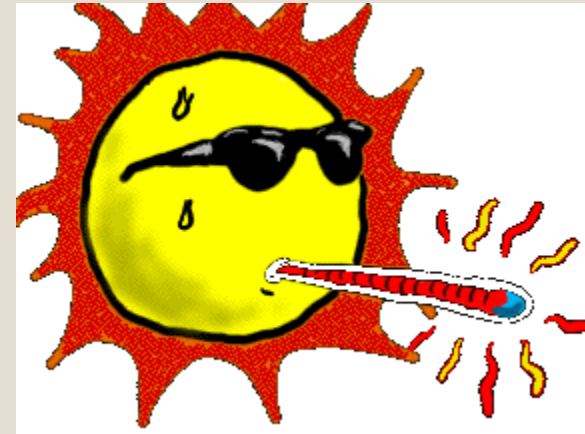

# In the spring...

The flowers bloom beautiful colors like pink and yellow. The grass grows back, fresh and green, and says "Hello!" The trees get their leaves back, feeling free. The sun starts shining oh so happily!

# In the summer...

- It gets really hot. The sun shines so bright, you can wear shorts and flip-flops! You can go swimming at the pool, and you can also have ice cream! That's really cool!

# In the fall...

The leaves start changing colors and falling off the trees. The flowers go away, the grass doesn't stay, and it gets a little chilly, you see. The leaves will turn red, orange, yellow, then brown and then they soon float to the ground.

# In the winter...

- You might see some snow; you might even get to go sledding if your parents know where to go!

Now you know all about the  
four seasons of the year!
