

Flying into Space

1. Second Grade
2. Science, Solar System
3. Solar System Scope (online virtual tour in space); Google Slides
4. As a class, we will take a virtual tour to the Solar System! We will look at the nine planets and the sun. At each stop, we will also look up fun and random facts about each. Before they leave, they will fill out an exit slip using Google Slides that each one can contribute to and make their own slide. The slide will contain their favorite planet and a fact about it. If they can't remember a fact they can explain why it is their favorite.
