

Learning Our Shapes

1. Second Grade
2. Math/Geometry
3. Google Doc and Drawing; GeoBoard app on iPad
4. As a class, we will be using Google Doc and Drawing to create shapes like triangles, squares, rectangles, and trapezoids. We will discuss that some can fit into others but they are not the same shape. Using the GeoBoard app, the students will stretch bands to create line segments to discover area and perimeter.
