

## Video Chat with Bill Nye

1. Second Grade
2. Science
3. Google Hangout; Google Forms on iPad
4. As a class, the students will have a live video chat with Bill Nye about anything! The topics can be random but about science or further questions about what has been taught in class. While they are chatting with Bill Nye, each one will have an iPad and logged onto Google Forms. Bill Nye will have created questions before and the students will answer them and then review with him, as well. The questions are open ended and about what has been taught or what they should know.
