

## We're Going on an Adventure!

1. Grade level: Second
2. Science (inhabitants)
3. Osmo Detective Agency; Padlet
4. As a class, we will use the game, Detective Agency that allows the students to go to various places around the world to try to catch the thief. Later, in groups of three (each group will have an iPad), they will create a Padlet board and post pictures of their favorite place and random facts about the place and the culture. Each group will need to decide on one place for the Padlet board. This way, when they present their board there won't be the same country presented twice.
