

Educational Software Write Up

Evaluators: Teagan Russell, Madison Martin

Title: Swift Playground

Version: 2.2

Publisher: Apple Inc.

Target Audience: Ages 4 & up (We disagree. Should be aimed at a higher age.)

Use in curriculum: This app can be used for coding purposes within the classroom.

Cost: Free

Describe the software: “Swift Playgrounds is a revolutionary app for iPad that makes learning Swift interactive and fun. It requires no coding knowledge, so it’s perfect for students just starting out.”

Describe your impressions on the software: We enjoyed looking through the app, but as said above, we believe that it should be aimed a higher age group. This coding app may seem like a fun game, but we could see how it could be difficult for younger children.

Does it pass APPS? Yes
