Teagan Russell

Mini Lesson #5

Grade Level: 1st

Topic: Measurement & Data- Our Pets

Standard: AR.Math.Content.1.MD.C.6- Organize, represent, and interpret data with up to three categories, using tally tables, picture graphs, and bar graphs.

Tools: Google Forms & Google Sheets

Synopsis: For this activity, I will create a Google Form, asking the students individually what pets they have at home. The options for this form will include dog, cat, fish, hamster, rat, none, or other. After each student completes the form, I will collect the data that I receive and give it to each student. Each student will then take the data and create a bar graph based on the results. I will go through the process with them on the board as they go, just to begin teaching them how to use the Google Form & Sheet option. After each student completes their individual Google Sheet, they will then use the 'share' function, and share it with me for a grade.
