

Title: ABC Mouse

Version: 7.12 (3-7-19)

Publisher: Age of Learning Inc.

Target Audience: Ages 4-7

Curriculum(s): all

Cost: free to download, \$7.99-\$9.99 monthly charge

Description: ABC Mouse is an app that is an interactive learning environment. When you first open the app, it is set up like a classroom, and the student can select where they want to go. The app then takes the child down a learning path where they play with games, coloring, songs/music, read books, and complete worksheets on a variety of topics. The app keeps up with this data and the student can pick-up where they left off. The parent can also keep up with progress.

Impressions: While this app is designed for younger child to get a head-start, we think that this app could be used to also help a student who is having difficulty. This is an app that we would recommend parents to download for their student to catch-up and get more experience with topics outside of the classroom. Since it is designed by teachers, we loved the content because it was all educational based. We think this is a great app option for families and maybe even the kindergarten/first grade classroom.
