

**Title:** Padlet

**Version:** 82.0

**Publisher:** Wallwisher, Inc.

**Target Audience:** ages 8+

**Curriculum(s):** none but can be used for English

**Cost:** free but limit of three padlets. Can go unlimited for \$8.33 of \$12.99

**Description:** Padlet is an app that focuses on creating organizers and putting information on the screen. You can use free hand, templates, add recordings, images, and share with others what you created. This app has a library page where you can see what everyone in the padlet community has created. You can design graphic organizers, KWL charts, to-do lists, and other organizers to showcase what is going on in your mind.

**Impressions:** We were not a huge fan of padlet for the younger elementary grades because it did not really explain the app and how to use it, so it took us a while to figure out what was happening. We also did not like the community feature because anyone can post anything there and is not always appropriate for school. It would be cool to use this app as class effort to come up with a KWL chart for a lesson. It can be used in the classroom, but you just have to be careful with what the student can see.
