

Mini Lesson: Money

1. Grade: Kindergarten
2. Curriculum Topic: K.MD.C.6 Identify pennies, nickels, and dimes, and know the value of each
3. Tools: PowerPoint and Kahoot
4. Synopsis: for this lesson, I will have premade PowerPoints of each type of coin that we will be discussing. The PowerPoint will have a picture of the coin, the value, and a catchy phrase that is easy for the students to remember. As a class we will go through each PowerPoint discussing the coins and discussing what makes each coin that coin. After the class discusses that the students understand the concept of money, students will then be broken into groups. One group will play a Kahoot game that assesses their knowledge about coins. Another group will get to play with fake money and divide the coins in appropriate groups. The last group will be with me. I will the students to show me every way to present \$.10 and so forth. I will use the Kahoot as an assessment as well. I will check and see how the students did, and that will tell me how strong their knowledge for money is.
