1. Name of Tool: Remind 101
   URL: https://www.remind.com

   Description of Tool: Remind101 is a too helpful tool for communication. This tool makes communication easy between both teacher and the families of the students. This is a great tool to keep parents engaged and up to date with any and everything that is occurring in the classroom. This is a safe tool for all ages because it does not require a phone number. The way this tool works is similar to a text message. Another great thing about this app is it has access to more than 70 languages, so the teacher can communicate with all families of the students.

   How I Plan to Use it: When I become a teacher, I know it will be very important to keep all parents up to date with activities and announcements that are happening in the classroom. I will use this tool as a way of keeping the families involved and informed by sending out information that is important.

2. Name of Tool: Kahoot
   URL: https://kahoot.com

   Description of Tool: This tool is used to make quizzes and other forms of questionnaires. This tool can be used on iPad, computers, etc.  The way this tool works is question appear and the student has a set amount of time to answer the given question. This is a fun way to learn because it makes It more like a game, and that engages the students in the learning that is occurring.

   How I Plan to Use It: This tool would be a great assessment tool. After a lesson, I would create a Kahoot that would allow students to play a fun game that assess their knowledge of the material that was just learned.

3. Name of Tool: Biblionasium
   URL: https://www.biblionasium.com/#tab/content-winter-picks

   Description of Tool: This tool serves as an online reading log for students. Teachers can track their students reading progress. Students can use this on-line tool to read books they are interested in, and the teacher can view that and keep track of their likes and dislikes.

   How I Would Use It: This tool would serve as a checkpoint reading assessment. I would give my students a monthly goal to read a certain number of books and keep an online log of those books. I could go to this on-line tool to see if my students achieved the monthly goal. This activity would allow students to practice and gain experience with reading.
