- Comic Master

http://www.comicmaster.org.uk/

Comic master allows you to create your own short graphic novel. This would be an easy way for students to learn and understand the components of a story such as characters, setting, plot, conflict, and resolution. Students get to completely make this their own and it is so awesome!

In my classroom I would use this to assess students understanding of the components of a story. It would probably be a project that we worked on over a couple of weeks that way the students have the opportunity to really develop their comic strip.

- Wordle

http://www.wordle.net/

Wordle is a web tool used to make word clouds of anything you want! It is very simple to use and great for all ages!

In my classroom I would use Wordle in a lot of situations. It could be used for the students to make mother's day gifts for an "all about mom" creation. It could also be used to access students on something they read for example "make a Wordle of the characters and main ideas in the book."

- ABC Mouse

https://www.abcmouse.com/abt/homepage?8a08850bc2=S2472641616.1543254892.7372&gclid=EAIaIQobChMI3teKvdDy3gIVDDFpCh1oSAkvEAAYASAAEgJWwvD_BwE

ABC Mouse is an early learning academy for children ages two to eight. The website has over 9 thousand activities and offers real learning results!

If I used ABC Mouse in my classroom I would have it on multiple computers or iPads with the tool on them that way during center time students have the option to go, use that technology and further their learning. I may also use it if students start to fall behind and need a little extra help.
